

Piktogrami za zaglavlje tablica

Nazivna struja (A)	Nazivni napon (V)	Napomena i dopuna	Masa
Broj vijaka	Navoj	Boja	Preporučeni alat za prešanje
Polukružni profil	Šesterokutni profil	Max. presjek vodiča	Max. promjer vodiča
Broj stezaljki	Dovodna strana	Odcjepna strana	Puni, použeni, savitljivi vodič
Raspon prešanja			

Piktogrami za tehničke parametre

Materijal spojnog elementa: Aluminij	Materijal spojnog elementa: Pokositreni bakar	Materijal spojnog elementa: žuti bakar	Materijal spojnog elementa: pokositreni elektrolitski bakar
Materijal spojnog elementa: elektrolitski bakar	Materijal izolacije: poliamid 6.6	Materijal izolacije: Polietilen	Materijal izolacije: Poliolefin
Materijal izolacije: Polipropilen	Materijal izolacije: PVC	Temperatura okoline	Zatezni moment
Montiranje na nosač	Omjer stezanja	Stupanj zaštite	Otpornost na vatru prema UL 94
U _i -Nazivni izolacijski napon			

Neizolirane okaste stopice **2**

Neizolirane okasto-cjevaste stopice **4**

Neizolirane produžene bakrene okasto-cjevaste stopice **5**

Neizolirane alumijske okaste stopice **6**

Neizolirane bakreno- alumijske okaste stopice **7**

Vijčane stopice **7**

Neizolirane viličaste stopice **8**

Neizolirana spojna čahura, s pokositrenim vijkom **8**

Neizolirane spojne čahure **9**

Neizolirane bakreno- alumijske spojne čahure **9**

Neizolirane igličaste stopice **10**

Vijčane spojne čahure i okaste stopice **11**

Izolacija za neizolirane stopice **12**

Vijčani spojni elementi za kabelski odcjep **13**

Zaštitna kontaktna pasta **13**

Izolirane okaste stopice **14**

Izolirane viličaste stopice **15**

Izolirane igličaste stopice **16**

Izolirane spojne čahure **17**

Toploskupljaća spojna čahura s kositrom **17**

Natične i utične stopice **18**

Neizolirani završni tuljci **22**

Izolirani završni tuljci **23**

Dupli završni tuljci **24**

Stezaljke s navojem za spajanje vodiča **24**

Bezvičane stezaljke za vodiče **25**

Bezvičana stezaljka za vodiče **25**

Vijčane stezaljke za vodiče **26**

Razvodne stezaljke za uzlazne glavne vodove **27**

Odcjepne redne stezaljke za glavne vodove **28**

Odcjepna stezaljka za glavni strujni krug **30**

Bakelitne redne stezaljke **31**

Fleksibilne redne stezaljke **32**

Industrijske redne stezaljke TSKA **34**

Bezvičane (opružne) redne stezaljke TSKB **38**

Neizolirane okaste stopice

Zaštitna kontaktna pasta

TRACON

VKP

Zaštitna kontaktna pasta

250 g / tubi

Namijenjena je za poboljšanje vodljivosti električnih spojeva, te za sprječavanje oksidacije i korozije na kontaktnim površinama.

Primjenjuje se na kontaktnim površinama Al – Al, Al – Cu i Cu – Cu spojeva, prije sastavljanja (prešanja), stezanja vijcima ili zakivanja.

Industrijske redne stezaljke TSKA

Redne stezaljke tipa TSKA sadrže više međusobno izoliranih jedinica vijčanih stezaljki. Namijenjene su prvenstveno u industrijske i slične svrhe, za strujne krugove u mjernim, upravljačkim i energetskim razvodnim ormarima.

Primjenjuju se za spajanje bakrenih vodiča okruglog presjeka. Plastično kućište im je izvedeno od poliamida PA6.6, otporno je na toplinu, ima veliku mehaničku čvrstoću i samougasivo je prema UL94-V0. Može se pričvrstiti na montažne nosače prema normi EN 50022 (profilna ili «C» letva). Temperatura okoline: -30 °C ... +90 °C.

Redne stezaljke za opće namjene

Primjenjuju se za spajanje faznih vodiča s presjekom do 25 mm². Jedna strana plastičnog kućišta im je otvorena. Zadnja stezaljka po redu može se zatvoriti završnom pločicom VL.

Redne stezaljke za jake struje

Primjenjuju se za spajanje faznih vodiča s presjekom od 35-185 mm². Spojke su izvedene od prešanog metalnog okvira. Kućište im je zatvoreno s obje strane.

Redne stezaljke za nul-vodiče

Izvedene su kao i stezaljke opće namjene. Kućište im je plave boje i pogodno su za spajanje nul-vodiča, jer omogućuju vizualno razlikovanje nul-vodiča od faznih.

Redne stezaljke nul-vodiča za jake struje

Izvedene su kao i stezaljke opće namjene za jake struje. Kućište im je plave boje i pogodno su za spajanje nul-vodiča, jer omogućuju vizualno razlikovanje nul-vodiča od faznih.

Redne stezaljke za zaštitne vodiče

Zbog zeleno-žute boje pogodne su za spajanje zaštitnih vodiča, te za međusobno električno i mehaničko spajanje uzemljenih nosača na koje su postavljene stezaljke. Predviđene su za spajanje PEN i PE vodiča.

Dvoredne redne stezaljke

Pogodne su za spajanje vodiča dva međusobno neovisna strujna kruga. Stezaljke su postavljene u dvije razine, jedne iznad drugih, a pristup odvijačem im je omogućen odgovarajućim oblikovanjem kućišta. Korisne su u slučaju nedostatka prostora.

Redne stezaljke s tri spojke

Prvenstveno se primjenjuju kada je potrebno spojiti vodiče istog strujnog kruga, ali različite strukture, tipa ili presjeka.

Redne stezaljke s četiri spojke

Prvenstveno se primjenjuju kada je potrebno spojiti vodiče istog strujnog kruga, ali različite strukture, tipa ili presjeka.

Redne stezaljke za mjerenja

Otvaranjem ili zatvaranjem ugrađenog kratko-spojnika omogućuju jednostavno redno ili paralelno priključivanje mjernih instrumenata u strujni krug. Pri TSKA6S mjerni otvor istodobno služi i za stezanje vodiča i za priključenje mjernog utikača (sonde).

Redne stezaljke za segmentiranje

Primjenjuju se za nazivne struje max. 16 A. Nož za segmentiranje je pogodan za pogonsko segmentiranje ili za kontrolu strujnog kruga s nazivnim naponom max. 500 V.

**Češljaste spojnice SF**

Služe za međusobno povezivanje rednih stezaljki. Izrađujemo ih u 2-, 3- i 10-članskoj izvedbi. Spojni dio je presvučen plastikom zbog električne polnoće i zaštite od slučajnog dodira.

**Češljaste spojnice USF**

Služe za međusobno povezivanje rednih stezaljki po sredini. Na raspolaganju su u 2-, 3- i 10-članskoj izvedbi do dimenzija TSKA50.

**Završne pločice VL**

Na krajevima reda i pri redanju stezaljki različitih dimenzija omogućuju izolacijski razmak za nazivni napon, te zaštitu od slučajnog dodira.

**Pločice za premošćivanje HL**

Pogodne su i za spajanje stezaljki koje se ne nalaze jedna uz drugu. Izolacija na vijku omogućuje zaštitu od slučajnog dodira. Spajanje više od deset stezaljki može se riješiti preklapanjem više pločica za premošćivanje.

**Pločice za razdvajanje strujnih krugova EL**

Služe za električno, a ujedno i vizualno razdvajanje dva susjedna premošćivanja. Mogu se i naknadno namjestiti.

**Pločice za razdvajanje segmenata SZEL**

Služe za električno i vizualno razdvajanje redova stezaljki.

**Elementi za pričvršćivanje RE**

Pogodni su za oslonac i pričvršćivanje rednih stezaljki na nosače dimenzija 35/7,5 mm ili 32/15 mm. Preporučuje se primjena na oba kraja reda stezaljki.

**Pločice za označavanje reda stezaljki KJ-A**

Pločice dimenzija 44x7 mm predviđene su za postavljanje u odgovarajuće udubine na elementima za pričvršćivanje RE1.

**J naljepnice**

J naljepnice u 4 dimenzije namijenjene su za J.. pločice za označavanje. Isporučuju se u A4 formatu, i na raspolaganju su: 1-100, L1, L2, L3, R, S, T, N, itd. Ponudu vidi na Webshopu!

**Pločice za označavanje J**

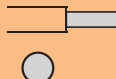

Na njih se mogu stavljati natpisi i omogućuju identifikaciju rednih stezaljki. Izrađuju se za 4 različite širine i isporučuju se u 10-članskoj varijanti.

za opće namjene, za nul-vodiče

za mjerenje, za segmentiranje

s tri spojke

za zaštitne vodiče

dvostruka

s četiri spojke

Bezvičajane (opružne) redne stezaljke TSKB

Bezvičajane redne stezaljke su namijenjene prvenstveno za brzo, kvalitetno i pouzdano spajanje vodiča od 0,2 – 6,0 mm² u upravljačkim i regulacijskim strujnim krugovima.

U stezaljke se mogu priključiti nepripravljene puni, te použeni i posebno savitljivi vodiči opremljeni završnim tuljkom ili igličastom stopicom. Vodljivi dijelovi su im smješteni u plastično kućište od poliamida, otporno na toplinu, velike mehaničke čvrstoće, samougasivo prema UL94-VO, te dobrih električnih karakteristika.

Oblikovano je za postavljanje na nosače prema normi EN 50022 (profilna letva).

Redne stezaljke za opće namjene

Primjenjuju se spajanje vodiča s presjekom od 1,5-6 mm² odozgo, na mjestima gdje manjka prostora. Kontakt je omogućen oprugom koja se nalazi u stezaljci. Rastavljanje spoja postiže se pomoću odvijača, pritiskom na oprugu.

Redne stezaljke za nul-vodiče

Izvedene su kao i stezaljke opće namjene. Kućište im je plave boje i pogodno su za spajanje nul-vodiča, jer omogućuju vizualno razlikovanje nul-vodiča od faznih.

Redne stezaljke za zaštitne vodiče

Zbog zeleno-žute boje pogodne su za spajanje zaštitnih vodiča, te za međusobno električno i mehaničko spajanje uzemljenih nosača na koje su postavljene stezaljke. Predviđene su za spajanje PEN i PE vodiča. Po konstrukciji mogu biti za opće namjene, s tri ili četiri spojke.

Dvoredne redne stezaljke

Pogodne su za spajanje vodiča dva međusobno neovisna strujna kruga. Stezaljke su postavljene u dvije razine, jedne iznad drugih, i pristup odvijačem im je omogućen odgovarajućim oblikovanjem kućišta. Mogu se naručiti i za nul-vodiče (u plavoj boji).

Redne stezaljke s tri spojke

Primjenjuju se prvenstveno kada je potrebno spojiti vodiče istog strujnog kruga, ali različite strukture, tipa ili presjeka. Konstrukcijski je omogućeno spajanje 3 vodiča na isti potencijal. Mogu se naručiti i za nul-vodiče (u plavoj boji).

Redne stezaljke s četiri spojke

Primjenjuju se prvenstveno kada je potrebno spojiti vodiče istog strujnog kruga, ali različite strukture, tipa ili presjeka. Konstrukcijski je omogućeno spajanje 4 vodiča na isti potencijal. Mogu se naručiti i za nul-vodiče (u plavoj boji).

Dopunski dijelovi

Premosnice AH

Izrađujemo ih u 2-, 3- i 10-polnoj izvedbi. Redanjem 2-polnih premosnica može se spojiti proizvoljan broj stezaljki. Vrijeme montaže se smanjuje s 3- i 10-polnim premosnicama, jer se jednim potezom može spojiti i do 10 stezaljki.

Pločice za označavanje reda stezaljki KJ-A

Pločice dimenzija 44x7 mm predviđene su za postavljanje u odgovarajuće udubine na elementima za pričvršćivanje REB.

Elementi za pričvršćivanje REB

Pogodni su za oslonac i pričvršćivanje rednih stezaljki na nosače dimenzija 35/7,5 mm ili 32/15 mm. Preporučuje se primjena na oba kraja reda stezaljki.

J naljepnice

J naljepnice u 4 dimenzije namijenjene su za J.. pločice za označavanje. Isporučuju se u A4 formatu, i na raspolaganju su: 1-100, L1, L2, L3, R, S, T, N, itd. Ponudu vidi na Webshopu!

Završne pločice VLB

Na krajevima reda i pri redanju stezaljki različitih dimenzija omogućuju izolacijski razmak za nazivni napon, te zaštitu od slučajnog dodira.

Pločice za označavanje J i JBO

Pomoću njih mogu se stezaljke označiti odozgo (J) ili sa strane (JBO) i time se pojednostavljuje identifikacija pri montaži. Dimenzije pločice su usklađene s dimenzijama pojedinih rednih stezaljki.

Vodič (3) je uz vodljivu šinu od elektrolitskog bakra (2) pritisnut čeličnom oprugom (1). Pri spajanju vodiča oprugu treba odvijačem pritisnuti u takav položaj, da se vodič može ugurati u otvor na opruzi. Nakon otpuštanja opruge ona će odgovarajućom silom pritisnuti vodič uz vodljivu šinu.

Snaga opruge je dovoljna da između vodiča i vodljive šine ostvari kontakt s tako malim prijelaznim otporom, koji je uobičajen pri stezaljkama s vijkom.

Za rastavljanje spoja slično kao pri spajanju odvijačem treba pritisnuti oprugu, nakon čega se vodič može izvući iz stezaljke.
